

AQUA WHE

Electronic instantaneous water heater

AQUA WHE is a fully electronic instantaneous water heater and is ideal for heating water in the bathroom.

Thanks to the flow sensor, the instantaneous water heater heats automatically from 0.1 bar and a water flow rate of over 2.5 L/min. The control circuit selects the appropriate heat output from the instantaneous water heater depending on the water withdrawal, desired water temperature and water flow temperature.

TECHNICAL DATA

- > Operating voltage: 400 V, 3~50Hz
- > Temperature: 30 °C to 60 °C
- > Installation: Wall assembly
- > Water pressure: 1.0 to 10 bar
- > Color: White
- > Protection class: IP 25
- > Protection class: I
- > Water connection: Gz 1/2"
- > Energy efficiency class: A

PRODUCT ADVANTAGES

- + One-step temperature adjustment
- + 4 switchable power ratings
- + Electronic control
- + Suitable for solar heating up to 60 °C inlet temperature for reheating
- + Operating control lamp
- + Easy replacement of old equipment

APPLICATION

- + from 9 kW: several sinks
- + from 12 kW: shower and sink
- + from 18 kW: bathtub and sink
