

# LAVA® BATH 2.0 PURE

Bathroom infrared heating panel with towel rail

The LAVA® BATH 2.0 PURE fits into your bathroom with simple elegance and provides cozy warmth. The surface material and 2 temperature limiters in all panels ensure safety during use at all times. The innovative technology makes the surfaces a very good radiation emitter. In combination with the even heat distribution on the surface, the optimally insulated back end guarantees a high radiation efficiency and thus a maximum of infrared heat radiation to the front of the room - once switched on, the surface is heated to a maximum of 80 °C and provides comforting warmth within a very short time. And, thanks to its included towel rail, it also ensures cozy, warm towels.

The practical plug & play box at the rear of all LAVA® 2.0 models enables simple installation of a controller, whether directly on the unit, by radio or by means of a wired controller (see also page 84). Available in traffic white RAL 9016 and nano anthracite RAL 7016.

## TECHNICAL DATA

- > Voltage: 230 V
- > Output: 350, 500, 700 W
- > Surface temp.: Max. 80 °C at standard internal temp.
- > Surface: Sheet steel
- > Device/install. depth: 22/52 mm
- > Connection cable: Plug-in cable: 1m
- > Wall mounting: Vertical
- > IEC protection class: I
- > IP rating: IP X4
- > Warranty: 5 years

## PRODUCT ADVANTAGES

- + 1 LAVA® Halti towel rail included - up to 2 more available as accessories
- + Highest radiation efficiency thanks to maximum radiation to the front
  - homogeneous surface temperature
  - large surface
  - optimally insulated rear part (approx. 40 °C)
- + Frameless Infinity Design
- + Plug & Play system for different, individual control options
- + High safety level against breaking and Overheating
- + No service, no maintenance necessary
- + Magnetic field free
