

LAVA® 2.0 ACCESSORIES

Everything for your LAVA® 2.0 infrared heating panel.

Choose from a wide range of accessories for LAVA 2.0 infrared heating panels via control, home automation and installation. In addition to various thermostats (naturally, in accordance with the new Ecodesign Directive), such as the eTOUCH WIFI with practical touchpad and WIFI function or the particularly easy-to-use eTWIST BASIC rotary thermostat,

there is also the possibility to integrate the LAVA 2.0 infrared heating panel with eNEXHO components into your home automation system. We will be happy to advise you on this. You also remain particularly flexible during installation - the LAVA®stand makes the infrared heating panel mobile and it can always be used where it is needed.
