

SOLAMAGIC® Z1

Premium stand infrared heater

The SOLAMAGIC® Z1 is the new, innovative infrared stand-alone device, which is not only impressive with its modern design, but also with its high level of safety and perfect heat. Thanks to the safety shutdown when the device tilts, as well as its soft start for inrush current limitation, the infrared heater leaves nothing to be desired. The casing is made of high-quality aluminum and is impressive with its noble design. The Solastar-AL heating element also combines pleasant colour temperature with perfect thermal behavior - with minimal residual light and a long service life of 5,000 hrs. on average. In the protected outdoor area, the Z1 infrared heaters enable extremely pleasant heat zones and are flexible in terms of placement. Due to its short wavelength, infrared radiation penetrates the air particularly efficiently, is not subject to wind drifts and guarantees high operating cost savings compared to gas heaters.

TECHNICAL DATA

- > Voltage: 230 V
- > Heating element: Solastar-AL (NoGlare)
- > Residual light: 1lux/kW/m²
- > Output: 1400 W
- > Colours: White, titanium, nano anthracite
- > IP rating: IP 24
- > Connection cable: Plug-in cable 250 cm

PRODUCT ADVANTAGES

- + Hardly any residual light (< 1 lux) due to the innovative "NO GLARE" heating element
- + No heating phase
- + No voltage peaks thanks to soft start
- + Emergency shutdown in case of tipping due to intelligent position sensor
- + Flexible placement
- + Timer function
